

Testimonials

HTS Designs was excellent. After providing them with a very detailed design document, HTS Designs understood my requirements and ensured that he could deliver ALL of the functionality under the proposed bid. They were very creative and utilized the latest technology, but kept the project under budget. Also, they took personal pride in making sure the site looked great. HTS Designs made themselves available during the entire process and recommended site improvements based on previous work with other clients. I would definitely recommend this firm and we would use HTS Designs for other projects. If you take a look at their portfolio, you will be very impressed. Since HTS Designs has designed over 100 sites, it was a no brainer for my company to go with HTS Designs for our internet store. This feedback comes from an ex-developer, IBM consultant, and IT sales guy.

A+++ Development Company--do not hesitate to use. Coded my site the exact way I specified and communicated promptly and efficiently. HTS Designs has great knowledge and skills, they can do just about anything you can throw at them. Never once questioned or misunderstood my requirements and delivered them with more than 100% accuracy. Development went according to stated schedule and did not deviate. This has by far been the best contracted work I have had done and I will definitely be using HTS Designs again for future development and additions to the site. Thanks again for all the hard work and effort.
